

Shivam Gupta

Python Full-Stack Developer | Django | Flask | React | PostgreSQL

+91 8108383003 shivamg8355@gmail.com GitHub LinkedIn Portfolio

PROFESSIONAL SUMMARY

Python Full-Stack Developer with professional experience developing and deploying business applications using Python, Django, Flask, React, PostgreSQL, and REST APIs. Experienced in building HRMS, e-commerce, and product management systems with authentication, role-based access control, database-driven workflows, and production deployment. Hands-on experience across backend development, frontend integration, database design, API development, security, testing, debugging, and deployment.

TECHNICAL SKILLS

Programming: Python, JavaScript (ES6)

Frontend: React.js, HTML5, CSS3, Bootstrap, Material UI

Backend: Django, Django REST Framework, Flask, REST APIs, JWT, SQLAlchemy

Database: PostgreSQL, SQL, Database Design, Neon DB

Authentication & Security: JWT, RBAC, Authentication & Authorization, Input Validation, API Security, bcrypt, CORS

Deployment & Cloud: TrueNAS, Vercel, Render, Cloudflare

Tools: Git, Postman, Waitress, Environment Variables

Development: REST API Development, Full-Stack Development, Testing, Debugging, Database Integration

PROFESSIONAL EXPERIENCE

AU Finja Jewels

2025 - Present

Software Developer — Python / Django / Flask

- Develop and maintain internal business applications supporting operational and management workflows.
- Develop REST APIs using Python-based backend frameworks and integrate them with React frontend applications.
- Design and maintain PostgreSQL database structures for business applications and data-driven workflows.
- Implement authentication and authorization using JWT, role-based access control, and secure API practices.
- Work across frontend development, backend development, database integration, testing, debugging, and deployment.
- Deploy and maintain applications in a production environment, including server configuration and environment-based settings.

PROJECTS

AU Finja Jewels — Product Management & Image Processing System

2025 — Completed | Production Deployment

- Developed a full-stack product management application for product data and automated batch image processing workflows.
- Built REST APIs using Python Flask with JWT authentication, bcrypt password hashing, and role-based access control.
- Automated product image processing and customizable image naming using the Pillow library.
- Designed PostgreSQL database architecture using SQLAlchemy ORM for product and inventory management.
- Developed a responsive React frontend with Bootstrap and interactive product image gallery functionality.
- Deployed the application on a production server using Waitress WSGI, environment-based configuration, and TrueNAS.

Technologies: Python, Flask, React, Bootstrap, PostgreSQL, SQLAlchemy, Pillow, JWT, bcrypt, TrueNAS, Waitress

E-commerce Platform

Completed

- Developed a full-stack e-commerce platform covering product, user, order, and payment management workflows.
- Built role-based dashboards for Admin, Buyer, and Seller users with permission-based access control.
- Implemented JWT dual-token authentication, bcrypt password hashing, email verification, and role-based authorization.
- Applied API security practices including CORS protection, input validation, and secure cookie handling.
- Developed the frontend using React and Tailwind CSS and integrated it with Django REST Framework APIs.

Technologies: React, Tailwind CSS, Python, Django REST Framework, PostgreSQL, JWT, bcrypt

AU Finja Jewels — Human Resource Management System (HRMS)

Completed

- Developed an HRMS covering leave management, attendance tracking, salary management, and performance evaluation.
- Built role-based dashboards and permission management for different user roles.
- Implemented JWT authentication, bcrypt password hashing, and role-based access control.
- Applied security practices including rate limiting, CORS protection, input validation, and secure cookie handling.
- Developed the frontend using React and Material UI and integrated it with Python Flask backend services.

Technologies: React, Material UI, Python, Flask, PostgreSQL, JWT, bcrypt

HRMS — Academic Project

2024 - 2025

- Developed employee management features with role-based access control.
- Designed responsive interfaces using HTML, CSS, JavaScript, and Bootstrap.

Technologies: Python, Flask, SQLite, HTML, CSS, JavaScript, Bootstrap

EDUCATION

Bachelor of Science in Information Technology

2022 - 2025

Mumbai University — Chandrabhan Sharma College, Powai

Higher Secondary Certificate (HSC)

2020

Maharashtra State Board — Vidya Niketan College, Ghatkopar

Secondary School Certificate (SSC)

2018

Maharashtra State Board — VPS School, Vikhroli

...
