PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building secure and scalable web applications using React, Python Flask, PostgreSQL, and REST APIs. Developed enterprise-level systems including HRMS and product management platforms with JWT authentication, role-based access control, and image processing workflows. Skilled in backend development, frontend integration, database design, security implementation, and deployment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6), HTML5, CSS3, Bootstrap, Material UI

Backend: Python, Django, Django REST Framework (Basic), Flask, REST APIs, JWT Authentication, SQLAlchemy

Database: PostgreSQL, SQL, Database Design

Tools & Deployment: Git, GitHub, Postman, Waitress, TrueNAS, Linux Basics, Environment Variables, Production Deployment

Security & Concepts: Role-Based Access Control, Authentication & Authorization, RESTful API Design, Input Validation, API Security, System Design, bcrypt, CORS

AI & Emerging Tech: Prompt Engineering, AI-Assisted Development

WORK EXPERIENCE

AU Finja Jewels

2025 - Present

Software Developer (Python / Django / Flask)

- Developing and maintaining internal business applications for operations and management.
- Building scalable REST APIs using Python Django/DRF/Flask/FastAPI and integrating them with frontend systems.
- Designing PostgreSQL database structures and optimizing business workflows.
- Implementing JWT authentication, RBAC authorization, and API security.
- Handling development, testing, debugging, and deployment processes.

PROJECTS

E-commerce

Work In Progress

- Developing a comprehensive E-commerce system to streamline business processes.
- Implemented modules for product management, user management, order management, and payment management.
- Created a role-based dashboard with dynamic role assignment based on user permissions (Admin, Buyer, Seller).
- Implemented advanced security including JWT dual-token authentication, bcrypt password hashing, Role-Based Access Control, and Email Verification.
- Applied security best practices including CORS protection, input validation, and secure cookie handling.
- Developing upcoming features including Mobile Number Verification and AI-driven product recommendations.
- Technologies: React, TailwindCSS, Python, Django Rest Framework, PostgreSQL

AU Finja Jewels HRMS

Work In Progress

- Developing a comprehensive Human Resource Management System to streamline organizational HR processes.
- Implemented modules for Leave Management, Attendance Tracking, Salary Management, and Performance Evaluation.
- Created a role-based dashboard with dynamic role assignment based on user permissions.
- Implemented advanced security including JWT dual-token authentication, bcrypt password hashing, and role-based access control.
- Applied security best practices including rate limiting, CORS protection, input validation, and secure cookie handling.
- Technologies: React, Material UI, Python Flask, PostgreSQL

AU Finja Jewels - Product Management & Image Processing System

2025 - Completed

- Developed a full-stack web application for automated batch processing and management of product images.
- Built secure REST APIs using Python Flask with JWT authentication, bcrypt password hashing, and role-based access control.
- Implemented automated image processing workflows with customizable naming using the Pillow library.
- Designed database architecture using PostgreSQL with SQLAlchemy ORM for product and inventory management.
- Created a dynamic responsive React-based frontend with bootstrap and interactive image gallery functionality.
- Deployed the application on a production server using Waitress WSGI with environment-based configuration on TrueNAS.

HRMS (Academic Project)

2024 - 2025

- Implemented employee management features with role-based access control.
- Designed responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Technologies: Python, Flask, SQLite, HTML, CSS, JavaScript

KEY HIGHLIGHTS

- Developed secure enterprise applications (E-commerce, HRMS) with JWT authentication and RBAC
- Built scalable REST APIs using Python (Django, DRF, Flask, FastAPI) and PostgreSQL
- Full-stack experience across frontend, backend, database design, and deployment workflows
- Integrating advanced features including image processing, AI suggestions, and mobile verification

EDUCATION

Bachelor of Science in Information Technology

2022 - 2025

Mumbai University (Chandrabhan Sharma College, Powai)

Higher Secondary Certificate (HSC)

2020

Maharashtra State Board (Vidya Niketan College, Ghatkopar)

Secondary School Certificate (SSC)

2018

Maharashtra State Board (VPS School, Vikhroli)
